

What is the retail price of Persona?

The retail price is \$3000 (US)

How durable is Persona?

Persona's construction is robust. It is designed keeping in mind the common physical shocks that might occur such as tipping over or running into furniture/people etc.

Is Persona only designed for adults?

Persona is designed for everyone. It is designed to be a wifi enabled, pet-like robot.

Do I need a wifi network?

Yes and no. Persona can operate as a standalone robot, with its onboard features. However to use more advanced functions, it needs a wifi network to connect to other devices.

However, Persona can host and operate its own wifi network. If none other are available, it can interact with the devices that connect to it.

How does Persona navigate around the house?

Persona is equipped with two optical cameras and ultrasonic range finders. With this it can map the surroundings as well as detect and avoid obstacles, such as people, furniture and walls.

What is the official release date for Persona?

TBD

Where does Persona ship?

Currently US only. However, we are working with distributors worldwide to make it available soon.

Can anyone set up and use Persona?

Yes.

Does Persona talk?

Yes.

Does Persona communicate wirelessly with my other devices?

Yes.

Who are our main partners?
